LA-25 'ABC' Pro semi-automatic labelling machine

07/06/18

Manual bench Labeller with rotating plate equipped with one single labelling station to apply self-adhesive labels on cylindrical, conical, square and shaped containers, also recommended for containers with low physical resistance to pressure, such as those in PET. Bottle insertion: vertical.
Possibility to install a second labelling station for applying a back label or a collar band.

Video found HERE

The ABC Pro machine is equipped as standard with the following groups:

- Labelling station for front label
- Electrical panel with display
- Rotating plate
- Upper blocking buffer

TECHNICAL SPECIFICATIONS

Type of container: .....cylindrical, square, conical, shaped
Dimensions min/max: .....for cylindrical from 55 mm to 120 mm
Hourly output: .....MAX.600 bph
Labeling tolerance: .....max ± 3,0 mm
Work cycle: .....electronic with digital control
No. stations: .....1 standard, up to 2
Paper passage: .....170 mm
Reel diameter: .....280 mm
Motorization: ..... single-phase motors
Container ejection: .....manual
Marking unit: .....optional
Pneumatic supply: .....4-6 bar, consumption 20 l/min
Power supply: .....240 V 50/60 Hz
Absorption: .....0,4 KW
Packing: .....Pallet
Weight: ..... 40 Kg without packing
Machine on wheels: .....NO, base cart upon request
Conforms to CE standard

Example Prices

ABC PRO - Standard version	£4,760

Options:

Labelling station to apply back label	£1,280
Labelling station to apply a neck label, collar band or a vertical band	£3,485
Stainless steel shaped ring for container's centering on the plate	£100
Adaptation for rubber rollers when containers have a label recess	£80
Kit for label's detection on already labelled containers	£285
Date / lot marker (hot foil printer)	£1,985
High rollers for paper passage from 170 mm to 210 mm, each station	£470
Stainless steel trolley	£540
Addition for 60 Hz motorization or other special voltages	£110
