LA-24 'ABC' semi-automatic labelling machine

07/06/18

Manual bench labeler with one labelling station suitable for self-adhesive labels to be applied on cylindrical containers, also recommended for containers with low physical resistance to pressure, such as those in PET. Bottle insertion: vertical. Possibility to install a second labelling station to apply the back label separately.

The ABC machine is equipped as standard with the following groups:

- Labelling station for front label
- Electrical panel with display

TECHNICAL SPECIFICATIONS

Type of container: cylindrical
Dimensions min/max: for cylindrical from 55 mm to 120 mm
Hourly output: **MAX. 600 bph**
Labeling Tolerance: max $\pm 3,0$ mm
Work cycle: electronic with digital control
No. stations: 1 standard, up to 2
Paper passage: 170 mm
Reel diameter: 280 mm
Motorization: single-phase motors
Container ejection: manual
Marking unit: optional
Pneumatic supply: NO
Power supply: 240 V 50/60 Hz
Absorption: 0,4 KW
Packing: Pallet
Weight: 35 Kg without packing
Machine on wheels: NO, base cart upon request
Conforms to CE standards

Example Prices

ABC - Standard version

£2,970
